New York dies after receiving vaccine. The child who was a 3rd grader at Park View school in Kings Park New York with no underlying conditions, perfect health. I wonder if it will even make the news. Please spread the word you or your children are not Guinea Pigs. Tell everyone before it is too late.

Adverse Reactions 1 Suspected Death

30 people had been reporting to the authorities in Sweden that they experienced such severe side effects that they felt the need to contact a hospital. Today the number is 140. The Swedish newspaper Expressen is the only one in Sweden reporting on these cases and as usual this is most likely only the tip of a rather large iceberg. UPDATE: According to Dagens Nyheter, the number of reported side effects are now a few hours later 190. 1 person dies after the injection but "no direct relation with the injection has been established". The biggest medical scandal in the history of Sweden has just started.

feels very worrying", she says. "- I did not sleep anything the night after the shot since the pain in my arm was so severe." The day after, at work, the fever came. She later had headaches. She still today, a week after the shot feels sick.

Another nurse, Jennely, could hardly walk five meters after she got sick from the "swine flu" vaccination. She was completely healthy when she got the shot but the day after she had 39 degrees centigrade fever (102.2 F). "- I could hardly walk the five meters I had to the bathroom", she says. The fever lasted for three days. Several of her colleagues at work had similar experiences. "- I know of at least ten that got fever, we are about 80 people at my workplace."
